

*3-D Rendering for Lincoln Street Parking Garage*

*Steel Frame Construction*

Dennis Corporation has designed many unique structural engineering projects. We have served clients in many facets of structural engineering including design, analysis, and inspection in both the public and private sectors. Our resources include state of the art design software as well as inspection equipment. In addition, we are able to produce vivid 3-D structural imagery for use in presentations.

Dennis Corporation can provide design services in both reinforced concrete and steel. Our staff has extensive experience with a wide range of structural projects, including buildings, bridges, foundations, retaining walls and parking garages. Our team of structural engineers, designer and CAD Technicians are proficient in the new 2006 IBC codes, seismic requirements, coastal wind load requirements and the new homeland security design initiatives.

If you would like to discuss a potential structural engineering project, please contact:
