Dennis Corporation's engineers have extensive experience in transportation projects and can provide the services to help you accomplish your transportation goals. All projects are carefully managed to maintain stringent schedules and to provide a superior product that meets our client's needs. A large portion of our work is repeat business as we continue to exceed the expectations of our clients.

Our services range from feasibility studies to complex roadway design. Our wide range of projects provide many unique challenges and often involve public programs and permitting with state and local agencies.

Our transportation services include:

- Data Collection
- Intersection Design
- Safety Studies
- Roadway Capacity Analysis
- Work Zone Traffic Control
- Transportation Feasibility Studies
- Parking and Special Event Planning
- Access Management Studies/Plans
- Roadway Geometric Design
- Bicycle and Pedestrian Studies
- Signing and Marking Plans
- Roadway and Street Restoration
- Pedestrian Facility Design
- Drainage Design
- Bridge Approach Design
- Interchange Design
- Sidewalk Design
- Streetscape Design
- Value Engineering
- Rural Roadway Design
- Bridge Design
