

Creek Undergoing Study for Sedimentation Contributors

Urban Ditch Prior to Implementation of Maintenance Plan

Lake Drawdown for the Dredging and Removal of Sediment Build-Up

Dennis Corporation's Water Resource Services focus on the study and assessment of storm water routing occurring through open-channel and/or closed-system flows (hydrology/hydraulics). Utilizing the latest stormwater modeling software Dennis Corporation personnel are able to model storm events from large watershed areas and drainage basins down to closed systems conveying stormwater through detention/retention facilities.

Our project managers and engineers assist our clients to meet their water resources needs no matter the scale. Dennis Corporation's experience and client dedication keep projects moving forward and on budget.

Our Project Personnel Provide:

- Conceptual Planning and Cost Estimating
- Environmental Investigations
- Watershed Studies and Assessments
- Stormwater Planning
- Detention/Retention Facility Design
- Development of Construction Plans and Technical Specifications
- Permitting Coordination
- Bidding and Award Administration
- Construction Management
- As-Built and Record Drawing Surveys
