- Feasibility Studies
- Noise Studies and Analysis
- Phase I Environmental Site Assessments
- Environmental Remediation
- Lead and Asbestos Investigations
- Public Involvement and Stakeholder Coordination
- Section 4(f) Evaluations
- Regulatory Agency Coordination

Dennis Corporation is committed to the timely delivery of environmentally sound projects. The Southeast is rich with natural and cultural resources and our environmental team recognizes the importance of these areas. Designing a project may seem daunting, however our environmental division can easily navigate the environmental permitting and regulatory process with our experienced staff, strong personal relationships, and innovative and efficient approaches. We are comfortable providing environmental services for state agencies, the Department of Defense, local municipalities and counties, and private land owners. Our staff is trained in many areas, able to recognize a host of potential environmental concerns such as water quality, air quality, historic properties, cultural resources, environmental justice communities, threatened and endangered species, noise impacts, hazardous materials, streams, and wetlands.

Environmental Construction Compliance

Lowcountry Tidal Marsh

If you would like to discuss a potential project, please contact:

Matt Hines, PE, Roadway Division Manager
